EDUCATION

Amrita Vishwa Vidyapeetham

Coimbatore, Tamil Nadu

B.Tech in Computer Science and Engineering — CGPA: 8.70 | 4rd Sem SGPA: 8.42

Aug 2024 – May 2028

- Relevant Coursework: Data Structures, Algorithms, Operating Systems, DBMS, User Interface Design

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, Haskell

Backend: FastAPI, REST APIs, SQLAlchemy

Frontend: React, HTML5, CSS3

Databases: SQLite, Neo4j

Tools: Git, Linux, Bash, Docker

Core Concepts: DSA, Graph Algorithms, Probabilistic Data Structures, System Design

PUBLICATIONS

Towards Sustainable Charcoal Production from Prosopis Juliflora

Integrating Local Knowledge and Clean Technology

2025

- Study focused on charcoal production practices in Adancheri village, Tamil Nadu, highlighting environmental, health, and socioeconomic challenges associated with traditional earth mound kilns.
- Applied Participatory Rural Appraisal (PRA) tools including resource mapping, seasonal calendars, and stakeholder consultations to assess existing limitations.
- Proposed improved kiln technologies, capacity-building initiatives, and sustainable resource management strategies tailored to local community needs.

PROJECTS

Eco-Fix — Smart Waste Management Web Application | React, Firebase, JavaScript, HTML, CSS

- Developed a responsive web application focused on promoting eco-friendly waste management and reporting solutions.
- Implemented Firebase Authentication and Firestore Database for secure user management and real-time data handling.
- Designed interactive user interfaces with React and modern frontend technologies to enhance user experience and accessibility.

FleetTrack — Real-Time GPS Monitoring System | ESP32, React, Node.js

- Developed a full-stack real-time fleet tracking system integrating ESP32-based GPS hardware with a React live dashboard.
- Implemented real-time vehicle location updates, route visualization, and backend telemetry processing.
- Designed scalable architecture for continuous monitoring and fleet data management.

G-Wallet — ACID-Compliant Digital Transaction System | FastAPI, PostgreSQL

- Engineered a secure wallet system with ACID-compliant transaction handling and concurrency-safe batch processing.
- Implemented authentication, audit logging, and admin-based verification workflow to reduce fraudulent activities.
- Designed modular REST APIs with robust backend validation mechanisms.

Bloom Filter URL Filtering System | Python, HTML

- Implemented a custom Bloom Filter to evaluate probabilistic URL filtering performance.
- Analyzed memory usage versus false-positive trade-offs for scalable filtering systems.
- Demonstrated efficiency of probabilistic data structures in high-volume lookup environments.

Neo4j Academic Graph Network | Python, Neo4j

- Designed graph-based schema to model students, courses, and relationships using Neo4j.
- Implemented efficient CRUD operations and CSV data ingestion for academic datasets.

- Optimized Cypher queries for faster traversal and relationship analysis.

Mines — Algorithmic Minesweeper Engine | *Java, C++, Graph Algorithms*

- Developed an algorithm-driven Minesweeper engine focusing on deterministic solving strategies and constraint propagation.
- Implemented graph traversal and logical inference techniques to optimize mine detection accuracy.
- Designed modular architecture enabling extensible board sizes and AI-based solution validation.

LEADERSHIP & RECOGNITIONS

NSS Unit-3 Student Coordinator

Amrita Vishwa Vidyapeetham

- Led community outreach initiatives and sustainability programs.

Aug 2024 – Present

Coimbatore, Tamil Nadu

Active Member

Youth United Council of India

- Participated in education and environmental volunteer activities; technical member.

Aug 2024 – Present

Coimbatore, Tamil Nadu

Hackathons

2024 – 2026

- Participated in Build2Break and Adobe India Hackathon.
